

Name of School: St. Louis School

(District: C&W)

**Evaluation on the Use of Strengthening School Administration Management Grant**

Item	Evaluation Criteria (Indicator)	Implementation	Evaluation on Effectiveness	Amount (\$)
<p>To procure a student data analysis system for consolidating the academic performance results of students over the years to gain a comprehensive understanding of students' learning. This will assist the school in taking follow-up actions and communicating with parents. The system should be able to generate an overall student performance profile by subject, class or group for assessment purpose to provide feedback for teaching.</p>	<p>Results of in-school examinations and public examinations can be consolidated and analysis.</p>	<p>Results of in-school examinations were consolidated and analysed.</p> <p>The following Final Exam results were consolidated:</p> <p>2012-2013 2013-2014 2014-2015 2015-2016 2016-2017 2017-2018</p>	<p>All teachers have been provided with some basic information about the SDAS.</p> <p>The SDAS is also activated to enable the following detailed analysis to be conducted in a very effective way – simply drag and select:</p> <p>Academic Progress, Class Subject Comparison, Class Performance, Class Subject Performance Distribution, Form Student Performance, Passing Rate Statistics, Student Cross Year Performance, Student Performance Tracking, Subject Improvement Statistics and Subject Statistics.</p> <p>Teachers have found themselves better informed about the learning progress of the students.</p> <p>The system will continue to be utilized to consolidate students' academic results.</p>	<p>80,000</p>

Item	Evaluation Criteria (Indicator)	Implementation	Evaluation on Effectiveness	Amount (\$)
To set up an automatic infrared thermometer system at the school entrances for instant monitoring of students' temperature.	Students with fever can be recognized by the system.	In 16/17 school year, the system was installed at two entrances in the school campus. It was employed to monitor students' temperature instantly.	<p>After the installation of the system, there is no need for the class teachers to check whether the students have measured their body temperature at home.</p> <p>The school also does not need to follow up the students who have not measured their temperature at home.</p> <p>It is found useful especially during the flu season.</p> <p>The system will continue to be utilized to monitor students' temperature.</p>	63.890
To procure a mobile app for parents and teachers to handle information management and communications	<ul style="list-style-type: none"> <li>Teachers and staff can input data to the system through the app. This saves time so that manpower can be deployed to give support.</li> <li>Parents can find it more convenient to handle school-related matters of their children through the app.</li> </ul>	<p>In 16-17 school year, the mobile app for teachers and parents was purchased.</p> <p>After a partial implementation in 16-17 school year, the app was fully launched in 17-18 school year.</p> <p>Starting from 18-19, all school circulars would be uploaded to the parents' mobile app so that parents can check the relevant circulars at all times.</p> <p>Similarly, all the school circulars related to teachers would be uploaded to the teachers' mobile app.</p>	<p>Through the use of the mobile app, parents can check their children's attendance records, payment history and relevant circulars at any time.</p> <p>Teachers can report students' attendance/absence directly through the app.</p> <p>The school can notify teachers about the relevant school circulars on one common platform.</p> <p>Information could reach parents and teachers more effectively and efficiently.</p>	41,700

			The system will continue to be utilized to enhance the communication with teachers and parents.	
To install an electronic notice display to announce the school's most up-to-date news and information, latest videos and activity highlights, etc.	<ul style="list-style-type: none"> <li>• Completion and implementation of the system.</li> <li>• Different levels of users are able to use the system and perform their functions accordingly.</li> </ul>	<p>At the end of 17/18 school year, the system of electronic notice display was installed in the school campus.</p> <p>Starting from 18/19 school year, accounts would be created for different special teams so that they could use the system to broadcast the announcements, school's most up-to-date news, information related to students' well-being, latest video clips and activity highlights through the 3 LCD displays in the school campus.</p>	<p>The school's most up-to-date news and activity highlights broadcasted through the system enables students be instantly aware of them and care more about their school and schoolmates.</p> <p>It also well serves as a medium for recognizing students' achievements and displaying students' work.</p> <p>The system will continue to be utilized to keep up the spirits of the students.</p>	54,495
